Helping students stay safer online from home

As you know, children's online safety is important. At school, Network for Learning (N4L) helps keep your students safe from the bad side of the internet. During lockdown, the students' place of learning shifts to their home. So N4L has worked out a way to help parents keep their children safely connected at home.

FREE N4L safety filter for all students

We've set up a safety solution that parents can set up on their child's learning devices from home. Just go to switchonsafety.co.nz to find clear instructions on how to do this.

The free N4L safety filter (by global cyber-security leader, Akamai) blocks websites containing known cyber threats like phishing scams, malicious content and viruses, while also protecting children from content deemed the worst of the web (like Adult sites).

How does it work?

Once a child's device is set up, all internet search requests will go through the safety net which checks to make sure the websites children try to visit are safe. The safety net is applied to the child's device, so parents' devices are not affected.

Any questions?

We have answered key questions at switchonsafety.co.nz/faqs alternatively please send any questions to help@n4l.co.nz.

What we need from you?

Please share the [attached](#) information with your parent community, so that they understand how they can apply a safety net to their child's device and find links to additional online safety tips from the team at Netsafe.
